

Dmitry Kuznetsov

Python Developer

📁 Employment History

Full Stack Python Developer at Netology

December 2021 — Present

Educational program.

I remembered Python, SQL and Git. On my own, I studied OOP principles, Docker and Django.

I am currently working on my pet-project — service which aggregates data from my favourite news sources using NLP (news and articles in «one window mode»).

Machine Learning at Netology

February 2020 — January 2021

Educational program.

I studied making machine learning models and their upgrading, recommender systems, time series, computer vision, neural networks and natural learning procession.

The final project was the recognition of the mask on the face in real-time (hello, COVID).

Senior CRM Marketing specialist at Amediateka, Moscow, Russia

April 2019 — Present

- the management of customers data from several sources
- dynamic HTML & CSS layout
- RFM segmentation using Python
- A/B testings with a control group and campaign analysis

🎓 Education

Master's degree, Moscow Aviation Institute (National Research University), Moscow, Russia

September 2009 — July 2015

🎓 Courses

Full Stack Django, Udemy

September 2021 — November 2021
